

Successfully Report MIPS in 2020 with the Qualified Clinical Data Registries Powered by Premier

Built in partnership with leading medical specialty societies and quality improvement experts, the Qualified Clinical Data Registries (QCDRs) powered by Premier provide individual clinicians and organizations of all sizes with solutions to help them successfully participate in the 2020 Merit-based Incentive Payment System (MIPS) program and avoid 2022 negative payment adjustments of up to 9 percent. With both self-service (manual data entry) and electronic data integration options, Premier has MIPS solutions to meet the needs of all providers.

The Qualified Clinical Data Registries include:

Self-service (manual data entry) and electronic data integration options

The Renal Physicians Association Kidney Quality Improvement Registry*

The Renal Physicians Association (RPA) Kidney Quality Improvement Registry is intended for nephrologists and nephrology practitioners to foster performance improvement and improve outcomes in the care of patients with kidney disease and related disorders.

Learn more about the [RPA Registry](#).

The National Osteoporosis Foundation Quality Improvement Registry*

The National Osteoporosis Foundation (NOF) Quality Improvement Registry is intended for all providers and specialists caring for patients with osteoporosis.

Learn more about the [NOF Registry](#).

The National Home-Based Primary Care & Palliative Care Registry*

The National Home-Based Primary Care & Palliative Care (NHPBC) Registry, created in collaboration with the American Academy of Home Care Medicine, the West Health Institute and Premier, is intended to improve patient care by putting population-appropriate measures into the field, benchmarking across home-based medical practices around the country, helping practices engage in a learning community focused on quality improvement, and providing a mechanism for home-based medical providers to report quality indicator data to the Centers for Medicare & Medicaid Services (CMS) in the context of value-based care and payment.

Electronic data integration options only

The American College of Physicians Genesis Registry

The American College of Physicians (ACP) Genesis Registry is intended for internists (ACP members and non-members) and physicians in other specialties, as well as nurse practitioners and physician assistants to foster performance improvement and improve outcomes in the care of patients.

The Premier® Clinician Performance Registry

The Premier Clinician PCPR supports electronic data collection, measure calculation and data submission to satisfy the PCPR reporting requirements for eligible clinicians and groups. Participation in PCPR gives you access to all MIPS Registry Eligible Measures, all available electronic clinical quality measures (eQMs), all Promoting Interoperability and Improvement Measures, and Specialty Measure sets.
